NGO Initiative: Computer Education for Students

This document highlights our NGO's mission to provide free computer education to students. We aim to empower underprivileged learners with digital skills that can help them build a better future. Our programs include: - Basic computer training - Internet and digital literacy - Skill development courses - Career guidance for students Why this matters: In today’s digital world, computer knowledge is essential. Our NGO ensures that students from all backgrounds get equal opportunities to learn and grow. Visit our website to learn more and support us: https://yourwebsite.com
